

V-FLEXA - Spécifications techniques

Description

V-FLEXA est un pneu radial spécialement conçu pour les remorques agricoles. C'est un produit Flotation de dernière génération doté de la technologie VF, qui permet de transporter des charges lourdes tant aux champs que sur la route avec une pression de gonflage inférieure de 30% par rapport à celle d'un pneu standard de même taille. Des ceintures en acier confèrent à la carcasse une plus grande résistance aux agressions. V-FLEXA non seulement supporte des charges lourdes en toute sécurité, mais il évite aussi le compactage du sol grâce à la parfaite répartition du poids. De plus, V-FLEXA a d'excellentes propriétés d'auto-nettoyage, une longue durabilité et une faible résistance au roulement.
